IS WHERE THE  IS

The *Unity Health Foundation* is pleased to announce our **'Home is Where the Heart is'** campaign. Our new campaign revolves around patient and associate safety. Our mission at Unity Health is to improve the quality of health and well-being for the communities we serve through compassionate care. We know your home is where your heart is and we want to help you get home quickly.

Our **'Home is Where the Heart is'** campaign focuses on three areas:

- Inpatient Physical Rehabilitation Center
- Patient Safe Handling Rooms
- Xenex Germ-Zapping Robots

Inpatient Physical Rehabilitation Center

Our facility at the Unity Health – Specialty Care Campus is in need of renovation to enhance patient and associate safety. Renovations will include widening of doors throughout the facility, patient rooms, family room, dining room, and gym area remodels and a new covered entrance; all with a home-like environment.

Patient Safe Handling Rooms

We will add ten patient safe handling rooms throughout the Unity Health – White County Medical Center Campus. These renovations and the addition of the Hoya Lift system will make caring for our patients safer for them and for our associates.

Xenex Germ-Zapping Robots

These UV-C light robots are used to go the extra mile when disinfecting patient rooms, and a way to make our hospital the safest facility it can be for patients and families. We are the first in the state in implement the Xenex Program as a way to enhance patient and associate safety. Our goal is to add a Xenex Robot to each unit in the hospital.

HOME IS WHERE THE HEART IS
